Band: Abuse (CDN)  
Genre: Brutal Death Metal  
Label: Comatose Music  
Album title: Nothing Is Safe  
Duration: 25:09  
Release date: 26.05.2017

Well, after 16 years you can get yourself together and produce a new album. At least that's what Abuse seems to have thought and so they release the "Nothing is Safe" as the successor of the debut "Like a Virgin", which was created in 2001.

All in all, there is not much to say about this album. After a short spoken intro, the beating and sawing begins. That's consistent throughout the whole length of 25 minutes.

The drums, which seem to be unfocused, heat up the whole thing, the guitars are buzzing and they drill around and the guttural vocals fly over the music like some kind of swarm.

Only rarely they slow down the velocity and there is no trace of melody to be found. Fans of blunt banging, which is by no means considered to be negative, will find delight with this album, as the instruments often resemble a pure chopping. Lord Marco, who is usually active for Six Feet Under, plays the drums and seems to be able to let off steam here.

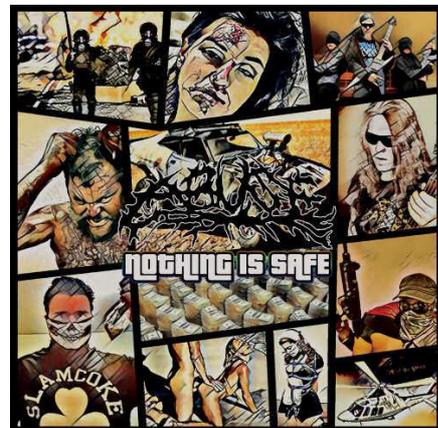

However, in the end it seems like they ran out of energy. The last songs no longer consist only out of Brutal Death infernos and thus a thrashy solo can be found in "Bitchkabob".

## Conclusion:

The album resorts to the typical features of Brutal Death Metal and thereby creates a fine album. However, there almost no noticeable up or down eruptions. Therefore an album remains which you can hear but it's not really necessary.

Rating: 6/10

Recommendation: Unsafeword

## TRACKLIST

01. "Fuck Me or I'll Kill Us Both"
