A new guarantor of traditional Swedish Black Metal rises from the depths of hell. Kadaverdisciplin is what the troupe from Västervik calls itself and they were already founded in 2014. At the end of October the debut "Death Supremacy" will be released to the heavy metal - audience. Some well-known musicians such as Frederik Widigs, who should be known as the drummer of Marduk and Nordjvel, are also responsible here. Vocalist Jimmy Nyhlén of Blodsrit should also be a known in the scene. This first work was presented to me without the optional bonustracks, however, which additionally contains another title as well as two Coversongs.

The disc and its title track start immediately without any nonsense. A furious drum fill-in opens up the black metal bustle with full steam ahead! Quick drumming and riffing in the classic soundboard hit me fullforce. Immediately, I positively notice the two-part guitar arrangements, which leave many catchy melodies with a recognition value and earworm character in the further course.

The nagging voice of Jimmie is now and then underlined with slightly barking growls. They are either sung by another fellow musician or as an additional soundtrack by himself. However, the vocals have been sung in a comprehensible manner for this sound.

Also the more stomping numbers and sections, such as the instrumental "Död Och Förödelse" (like an intro, which motivates to go to battle) or "Leading Them (Through The Pearly Gates)", turned out really cool. This is where the dark and morbid character of the Swedes is very apparent. I can justifiably say "All killers, no fillers"!

Both the tempo variations of the individual pieces, as well as the ones within them, create a varied and exciting listening experience in the 46 minutes. Apparently, the formation is doing great without bassists, as the two guitarists simply create a board of sound here. The recording quality and the differentiated sound of all the instruments of the debut contribute equally positively.

Conclusion:

Modern and at the same time traditional-Swedish Black Metal, "Chaos Supremacy" delivers to the listeners. If you think of Marduk and Watain as your favorites, you will not be able to get past Kadaverdisciplin! A grenade-strong debut, which the guys from Västervik delivered here. In a furious, fast, yet playful way, this work shoots into the black metal veins of every genre lover.
