"For I Am Genocide" is described best with the saying: clubs to the ready. Without any melodic intro the slaughter and massacre begins. Genre typical Death Metal without considering ears or neck. Because all of the tracks on the album invite to headbang, bulid aggressive Moshpits and Wall Of Deaths.

Everyone who likes this kind of music can't do anything wrong with this band. Friends of alternation better keep their hands off.

While listening to the album, most times you won't realize that you are already at the next track. Some songs sound very alike in composition, riffs and drums, even for a musician like myself. That really drops the fun of listening.

Only very rarely you can find some variations, but only as an intro or outro.

Only two tracks "Beyond Peretuation" and "Nihilism Reigns" can provide a little bit of variety.

A positive point to mention is the cover, which shows artistic talent and creates an atmosphere that doesn't fit for Brutal Death Metal but for Folk, Pagan or Black Metal.

Conclusion: To sum it up, the album appears at most times a little monosonic and boring. A constant slaughter, which is great for headbanging. It falls appart when you listen to it intensely, though.
