

# Metal Only

Das einzig WAHRE Metalradio im Netz!

Band: Scythian (UK)

Genre: Death Metal

Label: Hells Headbangers Records

Albumtitle: Hubris In Excelsis

Duration: 46:38

Releasedate: 21.08.2015

It took 6 years for the second full length album of the guys from UK to be presented to the Metal World. They build quite high expectations with their album title "Hubris in Excelsis" as translated it nearly means "excessive pride". Well, let's listen if pride will have a fall.

The English start rather leisurely up the music with acoustic guitar sound and choral vocals and raise carefully the speed. Scythian uses not only elements of Death Metal but also influences of Black and Thrash Metal for their Music. Guitar riffs rich in diversity run through the entire album. This combined with the forceful drums creates a pleasant sound to the listener. Just as VratH who shows his skills by growling neatly through the songs.

Well, despite the diversity the music doesn't contrast strongly with other albums of this genre. The structure of the songs sounds like one has heard it many times. It offers little innovations that let one thirst for it by listening to it again and again.

Conclusion: Indeed, the English don't have a fall by pride and offer a well-produced and varied album, but that certain something is missing that highlights the album from other albums. It is a good album for in between therefore one can listen to it without regret.

Rating 6/10

Recommendation: Apocalyptic Visions

Weblink: <https://www.facebook.com/ScythianUK>
