

Metal Only

Das einzig WAHRE Metalradio im Netz!

Band: Denouncement Pyre (AUS)
Genre: Black / Death Metal
Label: Hells Headbangers Records
Albumtitle: Black Sun Unbound
Duration: 49:49
Releasedate: 22.07.2016

With this, the Australian-based Denouncement Pyre pour out a strong piece of Black Metal. Although the information sheet also lists "Death Meta", the proportion of this genre keeps within limits.

The Australian orientate themselves toward the old Bathory and Dissection, meaning that the riffs oscillate between icy cold nasty, hymnal rapid and typical disharmonic shredding. Also they are not permanently stepping on the gas pedal, which is really beneficial for some songs, as it creates a gloomy morbid but nevertheless epic atmosphere. And with this variety enters the structure.

Concerning the vocal performance, one could name it Death Metal, but at that point the boundaries to Black Metal are blurring anyhow.

When it comes to the production, the album is turned out legit but mangy enough, a typical Black Metal output from a general point of view which contains everything that already had been there before...

If there would not be the intelligent and slightly progressive arrangements, one could speak about boring mass good. But by that one would not do justice to the band.

Just because of this variety it is really enjoyable to listen to this album and, above all, it all makes sense because these guys know what they do. And this, in fact, cannot be asserted about all the bands within this genre.

Conclusion:

Really solid work with good ideas put in songs that will not get boring and can be discovered again in new facets.

Rating: 8/10
