Rezet from northern Germany will release their third studio album on May 27th at their label Mighty Music. I know the guys since I got the tape from Rezet back in their debut year. I wondered how they would sound in 2016 – that's why I gladly wanted to listen to "Reality Is A Lie".

The essential things for the new production and the band itself are these points: gorgeous "hacking" guitars, impelling drums and rough, acrid vocals. Many solos and interludes mellow the songwriting and bring a very cool variation into the songs. Compared to the preceding albums, the guys from Rezet are more virtuosic and diversified now. I claim they don't play only Thrash Metal, they also drift off into classic Metal as you can hear in "Breaking The Chains". Thumbs and devil horns up for that!

With the title "Dead City", a cover song and all-time-classic from Violent Force is also represented on this new album. I picked my favourite songs in the recommendations below but a real bad song is not represented on this CD. The band also knows how to play emotional dreamy songs. They prove it impressively on the track "Lost". The song starts as a sheer instrumental with some playful acoustic guitar riffs and solos and build up bit by bit. Only after two and a half minutes the song starts really in a midtempo beat.

Conclusion:

"Reality Is A Lie" offers a very technical and varied Metal style, which can be found in the Thrash and also in the Heavy Metal genres. Rezet succeed a greatly increase comparing to their early days. It shows that the guys improved in composing and sound progressing on the album. Contemporary, Rezet create more pressure and pour forward with highspeed. The guys from northern Germany unchain a massive and well-made third album on the Metal scene!
